## II. SITE ACTIVITY:

Complete sections I through VII for all treatment, storage, and/or disposal facilities. Complete the forms (in parenthesis) in section VIII corresponding to the site activities identified below:

- |   |   |
|---|---|
| <p><u>  </u> A. Storage and/or Treatment</p> <p>    1. Containers (I)</p> <p>    2. Tanks (J)</p> <p>    3. Surface Impoundments (K)</p> <p>    4. Waste Piles (L)</p> <p><u>  </u> B. Land Treatment (M)</p> <p><u>  </u> C. Landfills (N)</p> | <p><u>  </u> D. Incineration and/or Thermal Treatment (O and P)</p> <p><u>  </u> <u>X</u> E. Chemical, Physical, and Biological Treatment (Q)</p> |
|---|---|

Note: If facility is also a generator or transporter of hazardous waste complete section IX and X of this form as appropriate.

(

V. MISCELLANEOUS

A. Does transporter haul  
Hazardous Waste into the  
U.S. from Abroad?

\_\_\_\_\_

B. Does the transporter mix  
Hazardous Waste of different  
DOT shipping descriptions  
by placing them into a single  
container?

\_\_\_\_\_

NOTE: If (A) or (B) were answered "Yes" then the Transporter is also a Generator and must  
comply with the Generator Regulations.

VI. REMARKS

Remarks: This facility is a small quantity generator, as it produces an  
estimated 900 kilograms of a 42% nitric acid solution per year. The  
solution is then diluted with water and is discharged into the City  
of Paris sewer system. All necessary NPDES permits have been received,  
and the City of Paris does periodically sample the material discharged  
into their system.
